This table, led in Chile by Tresmontes Lucchetti under the guidance of the United Nations Global Compact, brings together both the public and private sectors, the academia and international organizations such as the Food and Agriculture Organization (FAO) of the United Nations.

In this third meeting, Tresmontes Lucchetti presented a proposal to promote Healthy Communes, based on its experience of nearly 20 years in the prevention of obesity in public schools and its permanent dialogue with various institutions.

## Pozuelo Joins the Green Commitment

In order to offer consumers products that preserve the environment, 11 companies of the Business Alliance for Sustainability launched the Green Commitment program in all Walmart stores in Costa Rica.

These sustainable products have attributes that make a difference in terms of energy savings, materials and waste packaging and recycling, protection of natural resources, and community support.

## Hamburguesas El Corral Renewed Its Packaging

The new paper used to package El Corral Hamburgers has a very special origin: sugar cane. The biodegradable residue that remains from the extraction of the cane - known as “cane bagasse” - is now the source to produce the paper used in El Corral’s packaging. This paper reduces the need for additional inks over time, since the natural color of the packaging is used. Additionally, this type of paper needs no enameling.
